

PREVENT OFF ROAD DIRT FROM GOING ON ROAD

en.y.ron
WHEEL  WASHTM
EFFECTIVE WHEEL WASH WITH WATER RECYCLING

FEATURES OF THE ENYRON WHEEL WASH

UNIQUE RUMBLER DESIGN

The rumbler / gratings at the entry point of the system makes sure that loose dirt falls off the wheels.

NOZZLE PLACEMENT

The nozzles locations and orientation angles are carefully designed to get the most effective wheel wash.

AUTOMATIC START

Using smart sensors, the system automatically starts when the vehicle approaches.

EFFECTIVE RECYCLING

The water used in the system is recycled using excellent hydro-cyclones to remove dirt before reuse.

OIL / MUD SEPARATION

The system can come with oil skimmer and flocculent dosing pump to quickly settle the mud.

SUITING EVERY BUDGET

If you have a budget constraint, let us know. We will do our best to find a solution within your budget.

LESS POWER CONSUMPTION

The system uses less power than other comparable systems and hence is truly economical to operate.

EXCELLENT SERVICE SUPPORT

We at Excel Combine pride in our quick and efficient service team that will try to ensure that your system has minimum downtime.

Features will vary with the version / model of the system

Some specifications / dimensions of the system can be tweaked to make it perfect for your site conditions.

Contact us to know more.
